SUMMARY

I'm MERN Stack Developer with experience in building AI-integrated website using MongoDB, Express.js, React.js, and Node.js. Currently I'm developing an AI IELTS website that has Speaking, Writing module with AI automated scoring. I've hands-on experience on Laravel and Wordpress during my internship at BitzStudio. Interested to contribute to MERN or Laravel based projects and grow within a forward-thinking development team.

EDUCATION

- **BS Information Technology (Post ADP)**, University of Education Lahore (2026, Cont.), CGPA: 3.59/4.00
- **Associate Degree Program (ADP) in Computer Science**, University of Management & Technology (2024), CGPA: 3.82/4.00

SKILLS & SOFTWARE

- **MERN Stack:** MongoDB, Express.js, React.js, Node.js, JavaScript
- **Frontend:** Next.js, Tailwind CSS, HTML & CSS, jQuery
- **Backend & APIs:** Django REST Framework, Laravel, PHP, REST APIs, JWT Authentication
- **AI & LLM Tools:** Google Gemini API, LLM Integration, RAG Pipeline, ChromaDB
- **Databases:** MongoDB, MySQL, SQLite, Firebase
- **Tools:** Git, VS Code, WordPress

EXPERIENCE

- **FYP - IELTS AI Mentor— University of Education** **Feb 2026 - Current**
Currently developing AI IELTS website with Django REST Framework and Next.js, Integrating Speaking and Writing module along automatic scoring, feedback, and score evaluation that will be done by Artificial Intelligence, featuring secure JWT authentication, structured test workflow, and session management
- **Laravel & WordPress Intern — BitzStudio** **May 2025 – August 2025**
I Developed RESTful APIs for client-server communication and implemented secure authentication with CRUD operations in the admin panel. Optimized performance via local storage based session management. Built and customized WordPress themes, custom post types, and fields for dynamic content delivery.

PROJECT

- **AI Second Brain – Personal Knowledge Assistant**
Built with the MERN stack (MongoDB, Express.js, React.js, Node.js) and Google Gemini 2.5 flash. Users upload documents and can have conversations with AI about Document via a RAG pipeline, documents are parsed, chunked, embedded using Google Gemini, and stored in ChromaDB for fast retrieval.
- **IELTS AI Mentor**
Designing an AI IELTS preparation platform with Speaking & Writing modules, NLP based analysis, and automatic feedback, using Python/Django for backend services and interactive modules for real time speaking and writing evaluation.
- **Firebase Contact Application**
Responsive React app with full CRUD, Firebase authentication, and real-time data sync across sessions.
